SUSTAINABLE ENERGY

We are at the very beginning of a new energy in the world in which the main actors of this transformation are the wind and the sun. Solar and wind power are leading this clean energy revolution and the main facts that you need to know on Renewable Energies and how you can help your company and the planet are:

Renewable energy grows, as this new breakthrough cut costs and makes clean Energy even more and more available

The installation of new generation solar panels has been increasing astounding **200% per year**.

Brazil is scored 5th in the use of wind energy With an eye on this innovation and sustainability niche, Caelihcom presents several solutions for energy generation applied to the project, such as **solar panel**, **windmill** , **hybrid hydroelectric**
